Profile

Motivated Frontend-focused developer skilled in **HTML, CSS, JavaScript, Bootstrap, and jQuery**, creating responsive, user-friendly, and visually engaging web interfaces. Strong foundation in **Python and C programming**, problem-solving, and logical system design with the ability to translate requirements into clean and efficient code. Committed to delivering high-quality UI experiences, improving performance, and contributing effectively in collaborative, Agile development environments..

INTERNSHIP EXPERIENCE

PYTHON DJANGO FULLSTACK DEVELOPER INTERN, *TECHOLAS TECHNOLOGIES*

- – Developed full stack web applications using **Django, REST APIs, JavaScript, jQuery, and Bootstrap**, improving functionality and user interaction.
- Designed database models and optimized backend logic with **SQLite/PostgreSQL**, enabling faster data handling and smoother performance.
- Built responsive UI components with **HTML, CSS, and Bootstrap**, enhancing usability across devices and screen sizes.
- Collaborated using **Git, debugging, and Agile practices** to streamline development and delivery.

FULL STACK DEVELOPER INTERN, *Inventron Technologies*

03/2024 – 04/2024

- Developed responsive UIs using HTML5, CSS3, Bootstrap5, Java Script

Bangalore

SKILLS

TECHNICAL STACK

- Python
- JavaScript
- HTML5
- CSS3
- Bootstrap
- PostgreSQL
- Render
- C
- WordPress

Soft Skills

- Quick Learner
- Problem-Solving
- Teamwork
- Communication
- Adaptability

EDUCATION

Bachelor of Computer Applications (BCA) | Specialization in Artificial

2021 – 2024

Intelligence, *East West College of Management, Bangalore University*

Bangalore

CGPA: 7.5

PROJECT

E-Commerce Web App (Full Stack) [↗](#)

- Built using Django and PostgreSQL for backend and data management
- Integrated Django REST Framework to create secure APIs
- Designed front-end using HTML, CSS, Bootstrap, and React.js
- Implemented user authentication, product filtering, cart management, and payment gateway integration
- Deployed using Gunicorn and Render, with static file management via WhiteNoise

Gym Website Project – “FlyFitness” [↗](#)

- Developed a responsive gym website using **HTML, CSS, JavaScript, jQuery, and Bootstrap**.
- Created a clean and modern **transparent navbar** with smooth hover and scroll effects.
- Designed sections like **About, Services, Trainers, Workout Plans, Gallery, and Reviews**.
- Used **jQuery** for DOM manipulation, event handling, and interactive UI features.
- Implemented **form validation** for email, phone number, and required fields.
- Integrated **EmailJS** to send contact form data directly to email.
- Added **CSS animations and transitions** to improve user experience.
- Ensured **mobile-friendly design** using Bootstrap grid and media queries.
- Managed and deployed the project using **GitHub**.

Tech Stack :HTML | CSS | JavaScript | jQuery | Bootstrap | EmailJS | GitHub

Stronghold – Construction Company Website | React Project [↗](#)

- Designed and developed a **scalable single-page application (SPA)** using **React.js, React Router DOM, and Redux Toolkit**.
- Implemented **global state management** using Redux and Context API for authentication and application data handling.
- Built a complete **user authentication system (login/register)** with persistent state using localStorage.
- Developed dynamic features including **project gallery with modal preview, service selection with route-based data passing, and validated contact forms**.
- Created a **dark/light theme system** with persistent UI preferences using localStorage and React Hooks.
- Followed a **component-based architecture** with reusable UI components and clean folder structure for scalability
